Discuss IT Topic: Now that we are less than a week away from having a new Presidential elect, why has this race for the White House been so different than past elections? What issues have occurred throughout the election process and how has technology effected the voting process? (This question should have multiple answers). How do you think this election has changed the way people view the media? (Radio, Television, and the Internet) Explain…

Response: Please make sure all grammar, spelling, indentation, and punctuation is correct.

In a couple of days a new president will be elected. At this point I have no idea what is to come in the future. Good or bad the future is uncertain. This election is so different in my opinion from other elections because we can't exactly trust either candidate. There is no possibility to 100% trust or believe every word from either candidate. Before you could trust a candidate and believe they will bring good to us but now I feel like everyone is indecisive to who to vote for. Every speech a candidate gives changes the opinion of many. Like a ping pong game. It's in one side then the other and so on. During the election insults and childish fights have been what both candidates have been doing. Lies have been told with no one knowing if their true or not making us not be able to trust them. Even social media and technology its self has affected this. With jokes (memes) accusations and the abidance of the other candidate's. This was not an issue before because it didn't exist but now that it does it changes the opinion of many. Technology will and has changed the view point of voters. Since this affects peoples voting choice people who do notice this might envy technology and think of it as a disgrace for what it does. It lies and tricks the mind of those who don't see farther than their screens. At this point the world's innocence is going down at the speed of a roller coaster going down. It's only a matter of time until the rollercoaster reaches the bottom. Then what?
